HPV Vaccination: Protection That Lasts a Lifetime

01/07/2026

Research by Cancer Research UK shows the incredible success of the HPV vaccine!

It protects girls and boys from many different cancers. Teenagers are offered the vaccine in Year 8 at school. They can catch up until age 25 but it's best to get it sooner.

For more information please see: Cervical cancer mortality trends following HPV vaccination in England, 2001–24: an analysis of population-based mortality data - The Lancet
